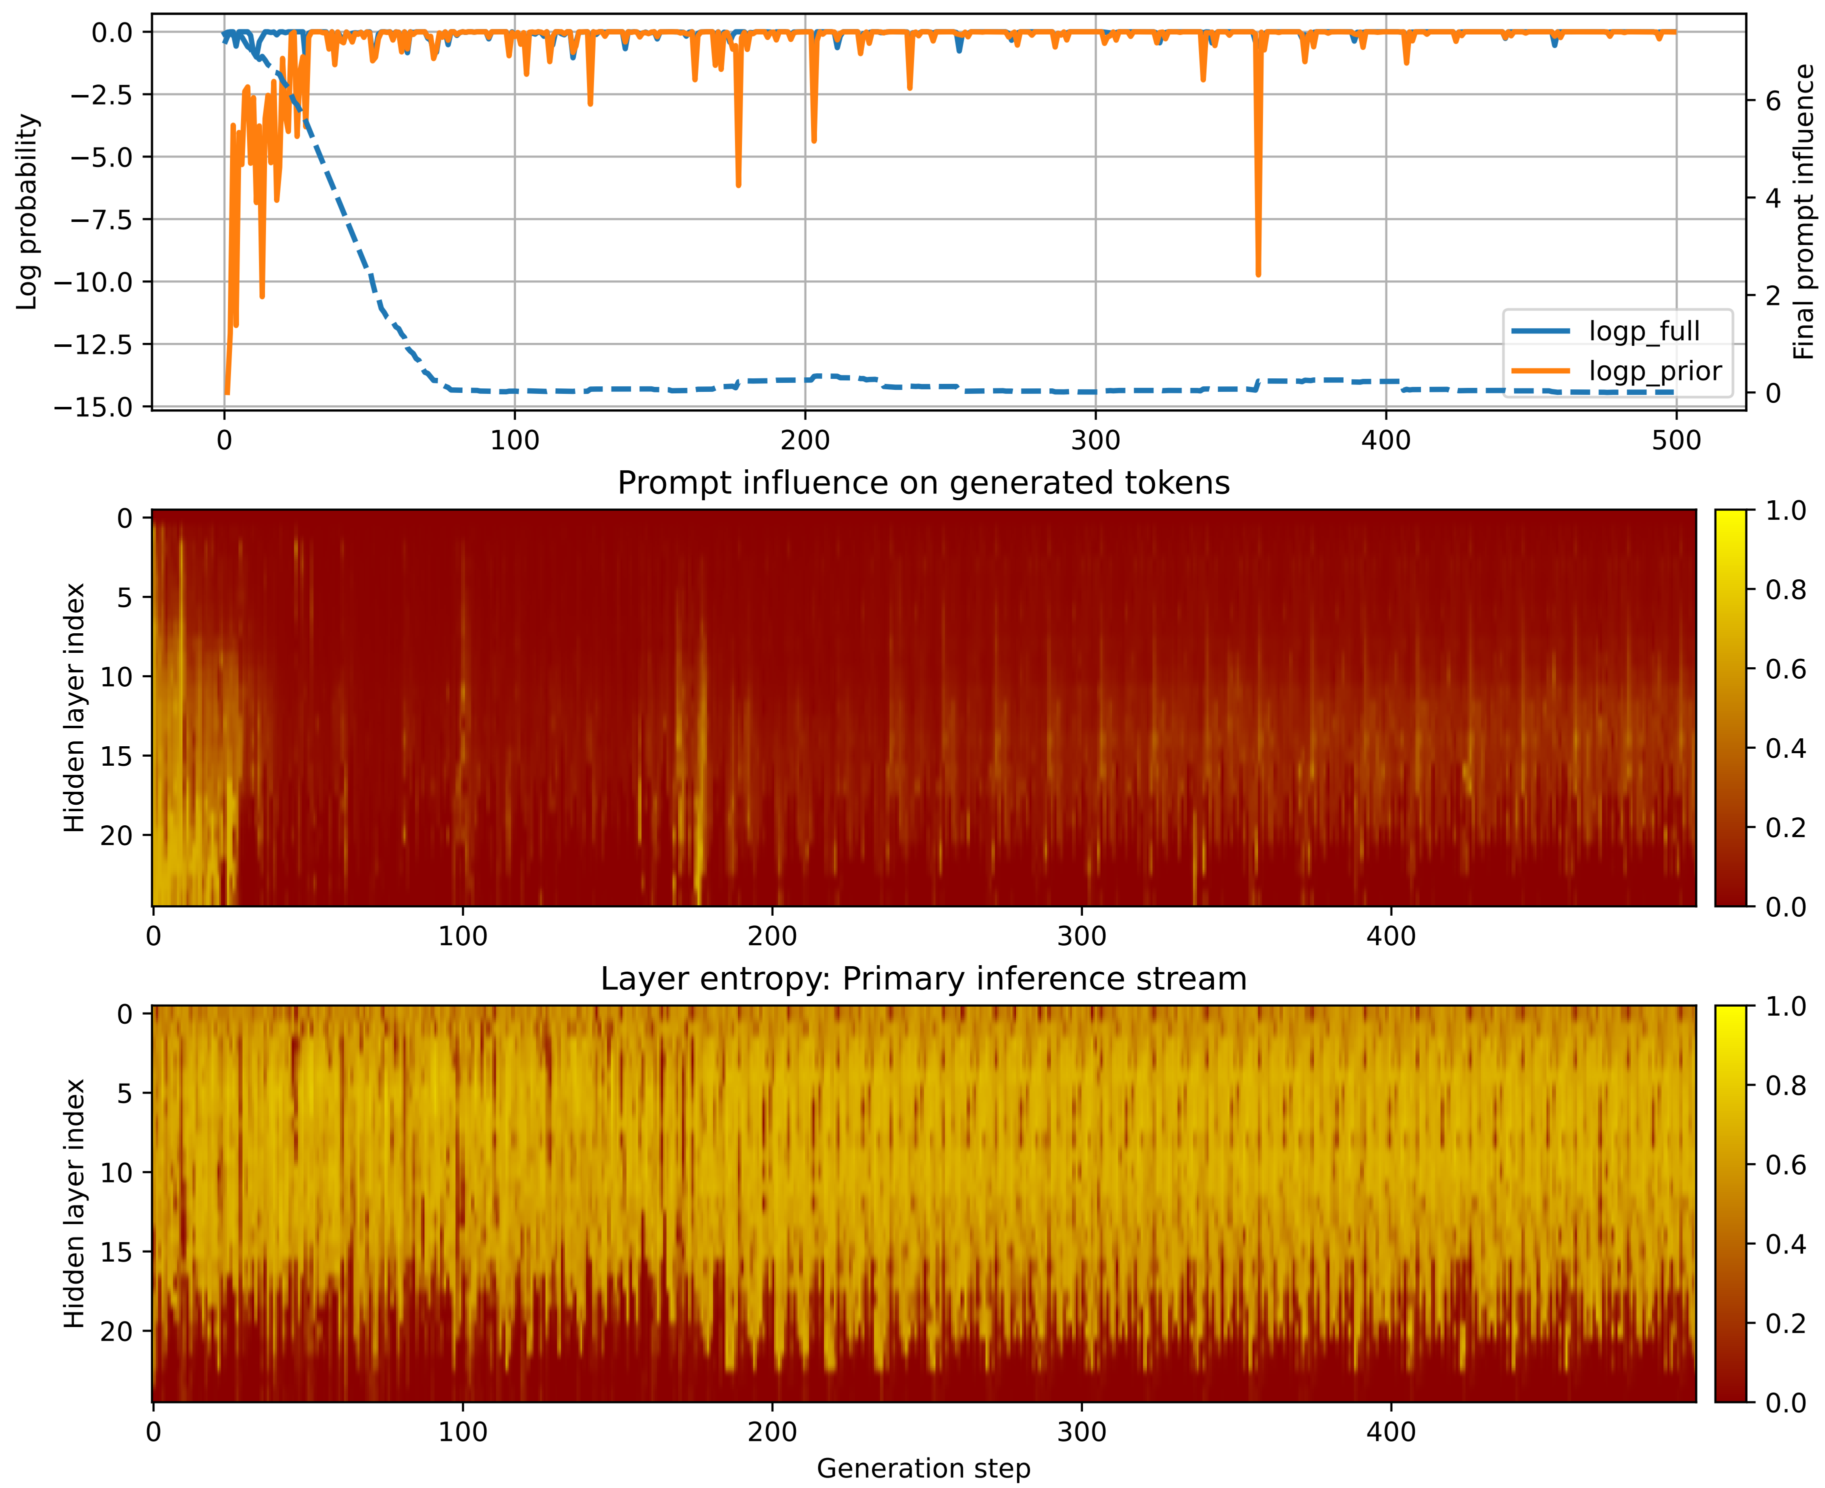
Prompt 1



```
PROMPT:
Task ID: PYC021  Return ONLY valid Python code. Do not use
Markdown fences. Do not include prose,
explanations, examples, print statements, or tests.  Your code
must contain this exact check-token line: #
CHECK_TOKEN: PYC021  Your code must contain this required symbol:
def sum_to_n  Implement this task: define
function sum_to_n(n) returning 1+...+n using a loop..  Start your
answer with the check-token line, then
provide the Python implementation.

MODEL RESPONSE:
# CHECK_TOKEN: PYC021  # Define function sum_to_n(n) returning
1+...+n using a loop.  def sum_to_n(n):     """
This function takes an integer n as input and returns the sum of
the numbers from 1 to n using a loop.
Parameters:     n (int): The integer value for which the sum
needs to be calculated.      Returns:     int:
The sum of the numbers from 1 to n.     """     # Initialize a
variable to store the sum     total_sum = 0
# Iterate from 1 to n (inclusive)     for i in range(1, n+1):
    # Add the current number to the total
sum         total_sum += i      # Return the final sum     return
total_sum  # Test the function
